Business growth and Central  
fill production

**SynMed®** **ULTRA**  
Synergy Medical Technology

## ULTRA Fast

SynMed® ULTRA is the most efficient blister pack automation on the market.

- Up to 180 single dose cards/hour, or 4 cards per minute
- Up to 90 multi-dose\* cards/hour, or 1.7 cards per minute
- No downtime for replenishment

\*Assuming an average of 7 Rx per patient

## ULTRA Clean

The only solution that offers this level of safety and convenience.

- No common chute
- External canisters are well adapted for cytotoxic meds
- No medication residue
- No daily maintenance

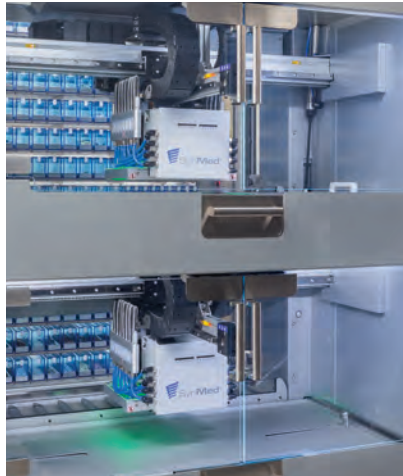

## ULTRA Precise

Unparalleled precision allowing for safe scalability.

- Tried and tested pick and place technology
- Robotic precision, free of errors
- High res image of each medication printed on the label
- Any meds positioned manually, e.g. half tabs, indicated on the label
- Number of meds contained in each blister indicated on the label\*\*

\*\*Dependent on card model selected

*"Our **close connection** with our clients' operations and their evolution is what led to the development of the SynMed® ULTRA."*

- Jean Boutin, President & Founder

## Successful central fill automation experience

SynMed® ULTRA offers **3 times the capacity, with only 1.5 times the footprint of the SynMed® XF.**

- **380 +** SynMed® XF robots installed in the past 10 years
- Expertise in setting-up & successfully running centralized blister pack production facilities

## ULTRA Flexible

Made to fit YOUR needs.

- Blister card model of your choice, 30+ and growing
  - Address different patient groups
  - Single dose & Multi-dose
- 2 picking units have ability to fill different cards simultaneously
- 508 internal RFID containers, unlimited external containers
- On site calibration in minutes – well adapted for generic changes, stock outs
- Small footprint
